**Subject:** THINGS NOT TO CODE send the inspector right?

Inspect the mold and the windows that are not sealed and send that to a REAL inspector not yours. I got pics too,

The code says you have a light in each room, but you do not.

The code says windows must be airtight

The code says that you must have screens form ... to ....

But yours had gaps,

When you showed my girl this place you did not tell her that you are missing 12 slats and that the ones still here will crack if moved.

So, Wonderly you made me pay for things you should have fixed before she moved in.

Where is the light in this living room?

There is none you provided so NOT TO CODE.

Three things....

Lets see if you inspector will look or I will send a real one.
